

Sinclair uses the public airwaves free of charge, and is obligated by law to serve the public interest. Given the fact that Sinclair has given strong financial support to the Republican party and the time frame in which they plan on airing this program, it is clear they are using the public airwaves to manipulate public opinion to bring about their own political agenda. That is a clear violation of the public's trust and I think we all should stand up against this blatant abuse. As the agency that monitors the use of the public airwaves it is your responsibility to see that the public is not used and abused by the large corporations that control large sectors of the public airwaves.

On behalf of the public you serve, please take some action to correct this abuse - no matter which political party or special interest group you have to stand up to. It's your job.

Thank You.
